afterburner.adam-bien.com

apache licensed

as lean as possible: 3 classes, no external dependencies
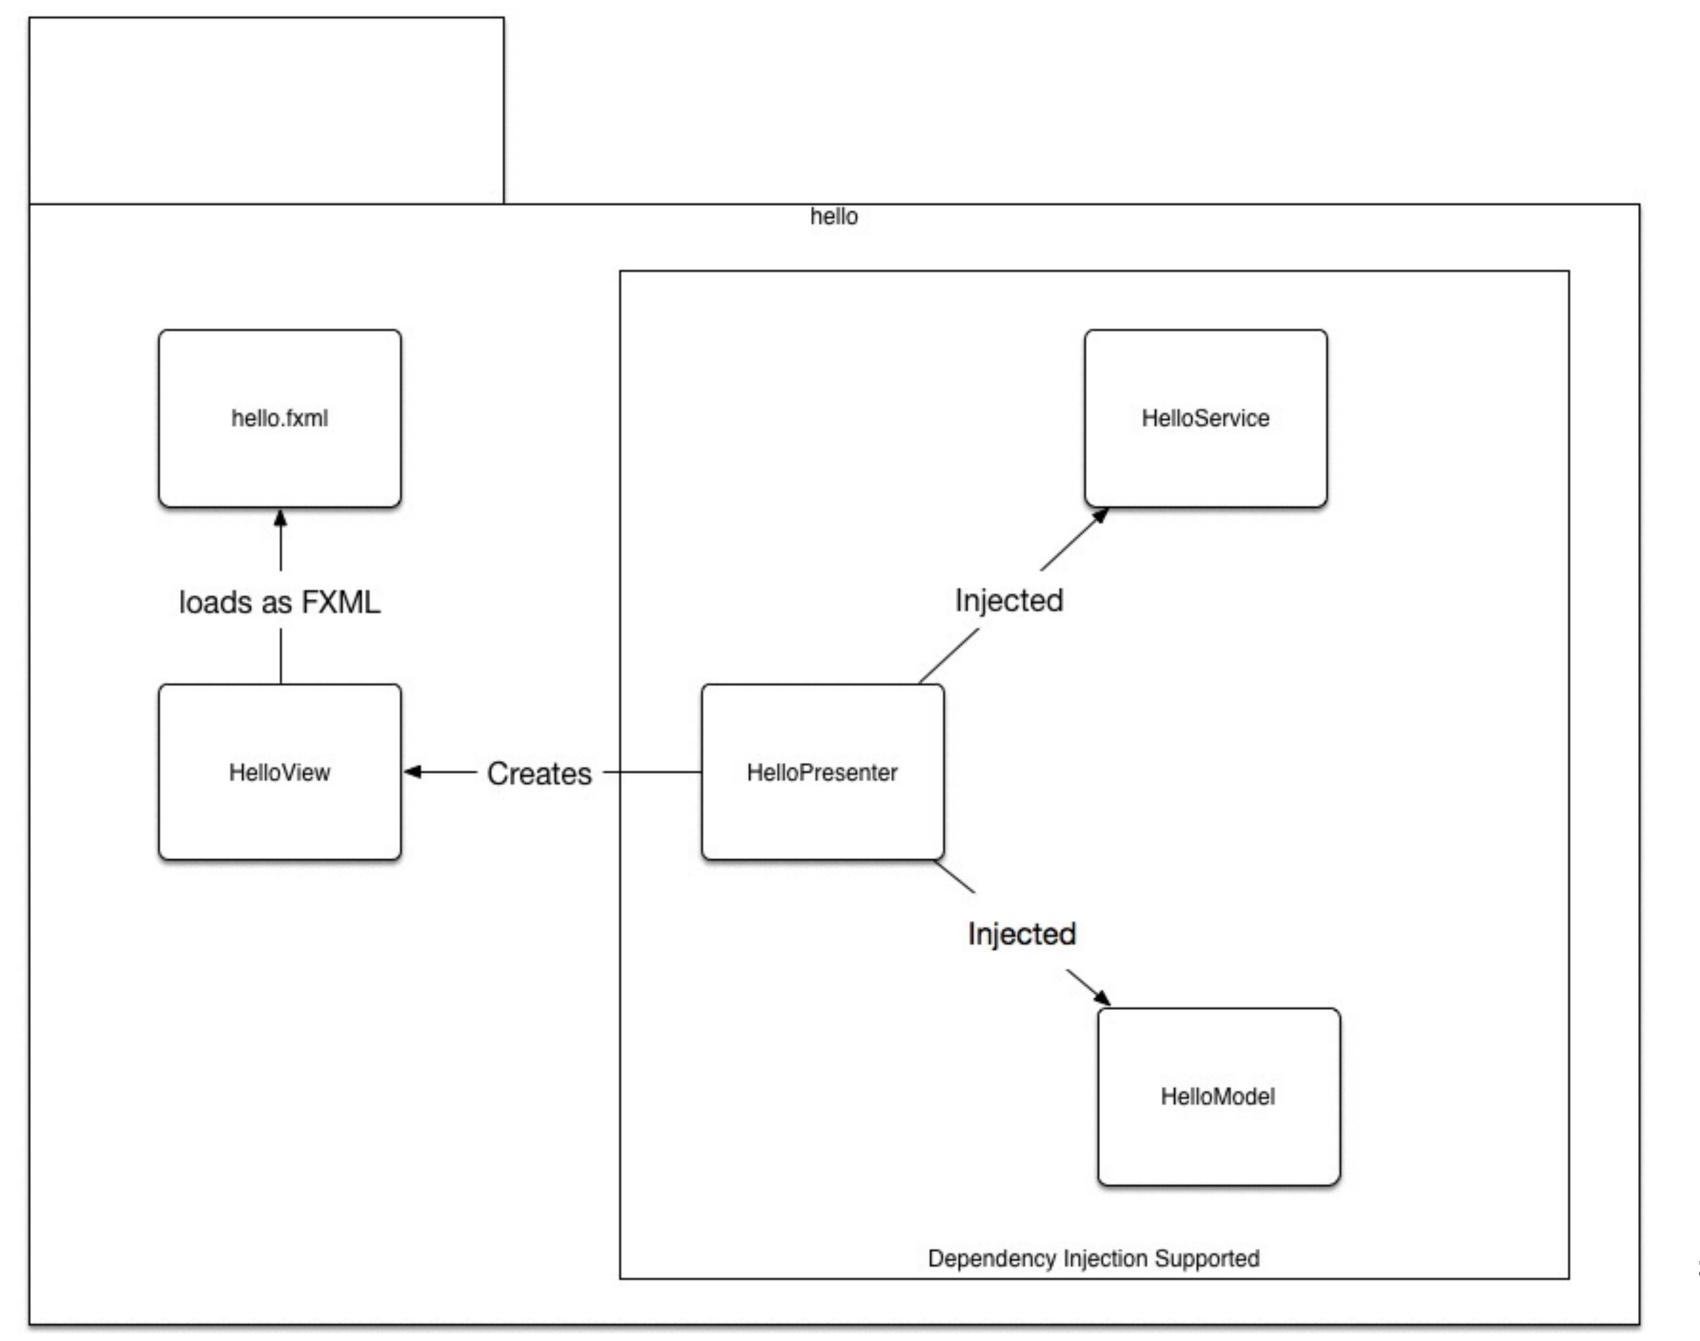

combines: FXML, Convention over Configuration and JSR-330 / @Inject

 integrated with maven 3

installation

```
mvn archetype:generate –Dfilter=com.airhacks:igniter
```

or

```
<dependency>
  <groupId>com.airhacks</groupId>
  <artifactId>afterburner.fx</artifactId>
  <version>[LATEST_RELEASE]</version>
</dependency>
```

hello

hello.fxml

loads as FXML

HelloView ← Creates ─ HelloPresenter

HelloService

Injected

Injected

HelloModel

Dependency Injection Supported
